Appl. No. 10/064,971 Amdt. dated July 10, 2006 Reply to Office action of April 28, 2006

## Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

## Listing of Claims:

- 1 (currently amended): A method for preventing repeat printing to a document by a printer,
- 5 the printer comprising a sensor, the printer capable of receiving the document and printing data onto the document, the method comprising:

receiving the document;

determining if the document has a printing sign using the sensor;

printing data onto the document with the printer when the document does not have

the printing sign;

not printing data onto the document with the printer when the document already has

the printing sign; and

printing the printing sign onto the document with the printer when the document does not have the printing sign.

that presses the document against the print head.

- 6 (original): The method of claim 4 wherein the print head is a thermal print head.
- 5 7 (original): The method of claim 1 wherein the printer prints one color at a time.
  - 8 (original): The method of claim 1 wherein the printer further comprises a capstan roller and a pinch roller capable of driving the document forward and backward.
- 9 (original): The method of claim 8 wherein the printer further comprises a motor that drives the capstan roller to rotate.
  - 10 (original): The method of claim 1 wherein the printer is a thermal transfer printer.
- 15 II (original): The method of claim 1 wherein the printer is a thermal inkjet printer.
  - 12 (original): The method of claim 1 wherein the printer is a dot matrix printer.
  - 13 (original): The method of claim I wherein the printer is an inkjet printer.
  - 14 (original): The method of claim 1 wherein the printer is an electrostatic printer.
